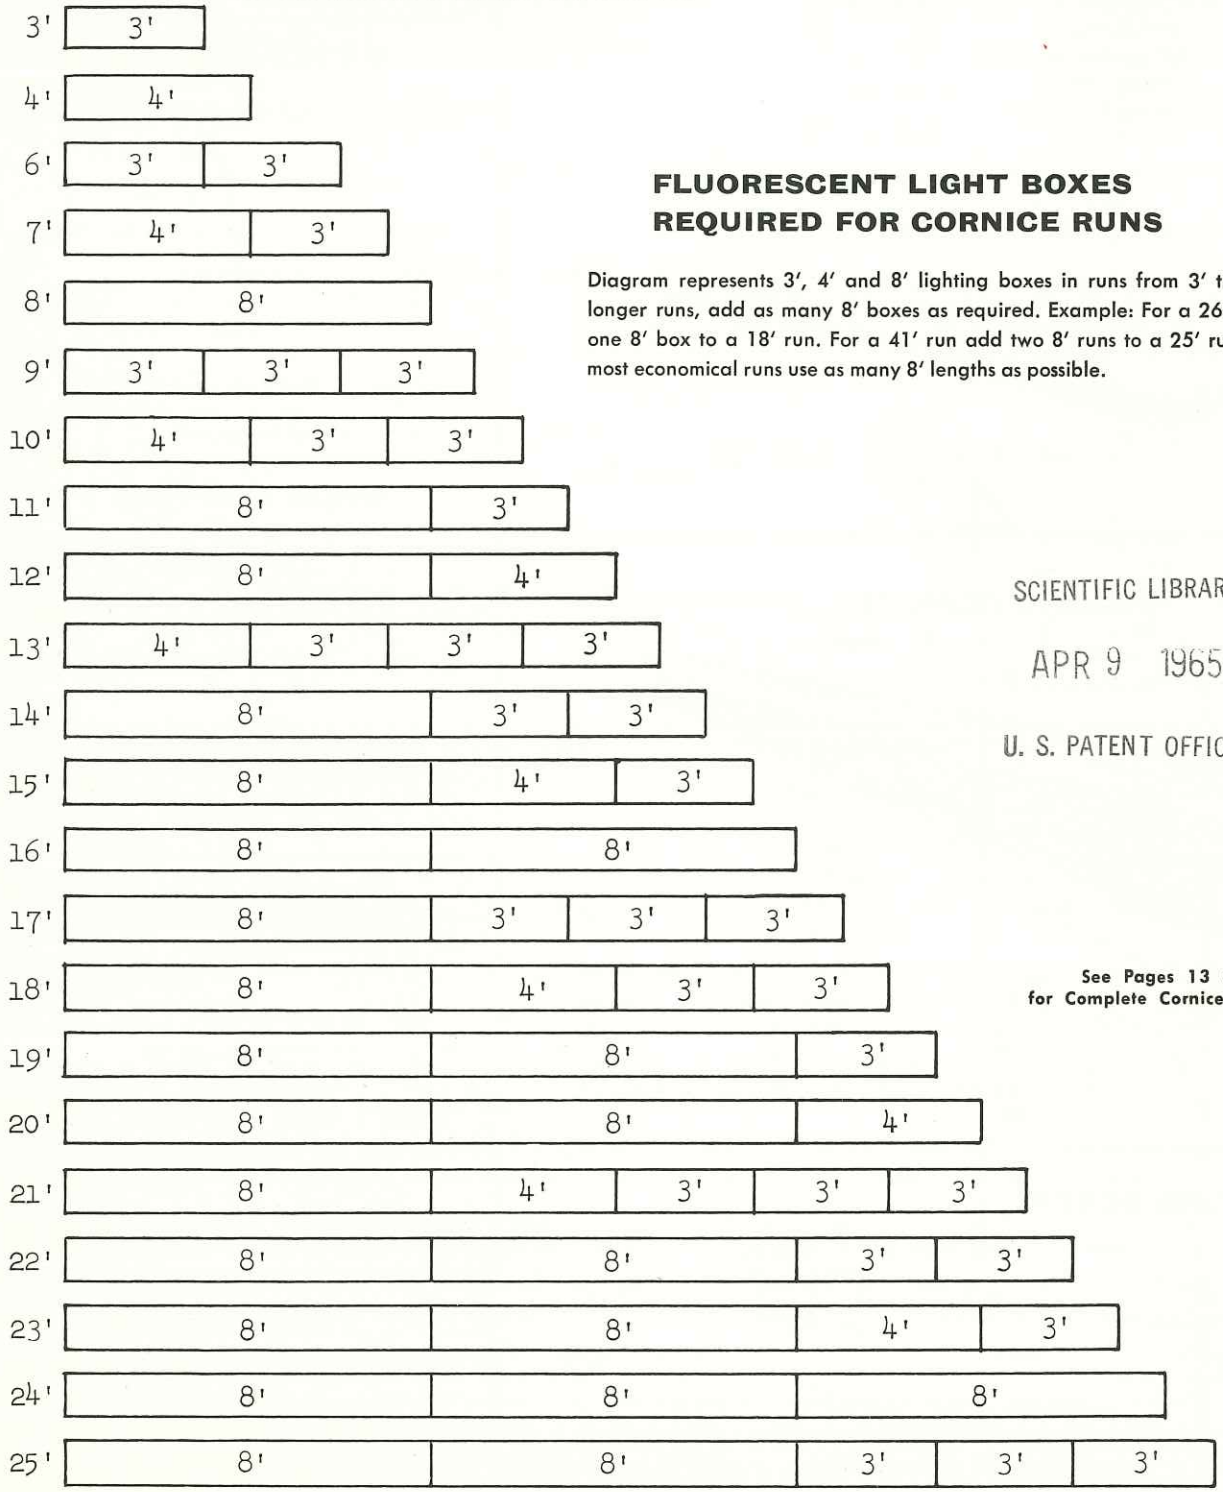
GENERAL CORNICE INFORMATION

FIGURING LIGHTING REQUIREMENTS FOR CORNICE RUNS . . .

1. Refer to Pages 13 and 14 of Price List for Cornice Brackets. Order one right hand and one left hand bracket (of required length) for each three or four foot section. Order one bracket clip (GCBC-1) for each upright.
2. All necessary parts including screws are included with each lighting box. Male and female plugs are already wired in boxes and need only to be plugged one into the other in tandem for any length lighting run.
3. Lighting boxes are available in 3', 4', and 8' lengths. Refer to chart below for Boxes required for any given length run up to 25'. For longer runs add as many 8' boxes as required.
4. End Caps (GCP-1) for lighting boxes are ordered separately and are also used as splicers. One splicer is required to span joints between boxes and one is used as a cover at the ends of each run. Order one splicer for each lighting box and one extra to cover the ends of the run.



FLUORESCENT LIGHT BOXES REQUIRED FOR CORNICE RUNS

Diagram represents 3', 4' and 8' lighting boxes in runs from 3' to 25'. For longer runs, add as many 8' boxes as required. Example: For a 26' run, add one 8' box to a 18' run. For a 41' run add two 8' runs to a 25' run etc. For most economical runs use as many 8' lengths as possible.

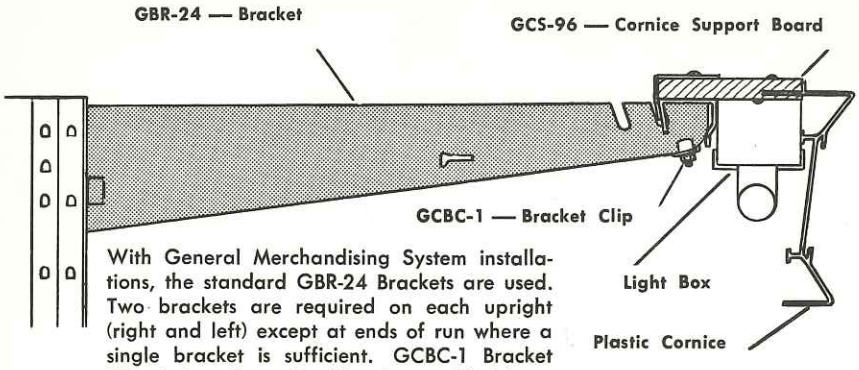
PLASTIC CORNICE AND ACCESSORIES



With General Merchandising System installations, the standard GBR-24 Brackets are used. Two brackets are required on each upright (right and left) except at ends of run where a single bracket is sufficient. GCBC-1 Bracket Clips bolt to the ends of brackets and hold cornice support board which in turn retains the light box and plastic cornice.

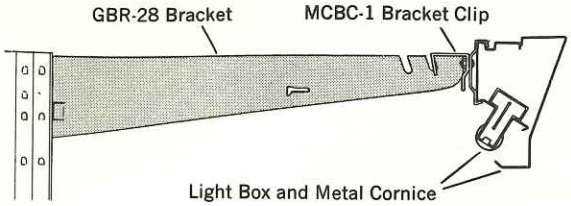
METAL CORNICE AND ACCESSORIES



With General Merchandising System installations, the standard GBR-28 brackets are used. One bracket (right or left) on each upright is all that is necessary. However, two (a right or left) may be used when top display shelves or metal soffits are required. MCBC-1 Cornice Retainer Clips fasten to ends of brackets and bolt to cornice adapter clips securing the light box and cornice assembly. NOTE: Adapter clips are furnished with each light box and cornice assembly—MCBC-1 Cornice Retainer Clips must be ordered separately (one for each upright).
